

ACCESSIBILITY

Web content accessibility is about making the web accessible for people of all levels of ability.

Whatever the language, culture, location or physical/mental ability, when the web meets accessibility goals, it becomes more accessible to people with a diverse range of hearing, movement, sight and cognitive abilities.

We want everyone who visits our website to feel welcome and find the experience rewarding.

To help us make this website a positive place for everyone, we follow the World Wide Web Consortium (W3C) [Web Content Accessibility Guidelines \(WCAG\) 2.1](#), which includes three levels of accessibility.

The WCAG 2.1 guidelines explain how to make web content more accessible for people with disabilities and user-friendly for everyone.

This website endeavours to conform to Level A of the WCAG 2.1. We realise there may be some areas that need improving. The following explains what we are doing to make that happen:

1.1.1: Non-text content

We will provide alternative formats on request. Please [contact Renewal SA](#) with your requests.
